

## SETTLEWARE RECOGNIZES JUNE 2010 AS 'National e-Sign Awareness Month'

- Global e-Commerce 'Glue'
- Benefits Every Business-1 -10,000 employees
- Corporate Social Responsibility

Orange County, CA MAY 30, 2010 Settleware Secure Services, inc. has announce today that, in celebration of the 10<sup>th</sup> Anniversary of the passage of the US [Electronic Signatures in Global and National Commerce Act](#) that it recognizing the entire month of June to advance and heighten the awareness of the benefits of e-Signatures.

'On June 30, 2000 President Bill Clinton 'inked' the E-Sign Act into law that will go down in history as one of the most important pieces of legislation ever written. The essence of the legislation is that affixing an electronic signature to a contract/agreement holds the same legal weight in a court of law as wet-signed original" stated Settleware President & CEO, Founder, C. Richard Triola. "After 10 years of validation we are beginning to see acceptance and adoption on the rise. I liken it to the ATM machine-it only took 17 years for mass adoption, so I see we are now rounding 2<sup>nd</sup> ' Triola continued.

Although e-Signing has been embraced by large institutions like the US patent office, County Recorders, Secretaries of State, Fannie Mae, FHA and Wells Fargo, the benefits of streamlining processes and eliminating the need to legally execute a contract with 'pen on paper' have benefitted small to medium size businesses as well.

"Of all the technologies available to us in the 21st century: electronic signatures truly have had the most profound impact in business, the environment and our economy. This single point of use ability eliminates the need for couriers, printers, fax machines, paper, and pens and is an aid in moving along the dollar more expeditiously during the normal business transaction. Green is the new black and the new "e" word is esigning. Bottom line, it's becoming THEE de facto standard of doing business" says successful entrepreneur and real estate broker, Lillian Walker. "Our entire office is using Settleware's e-Sign platform for almost 2 years and I can honestly say that this has changed the way we do business, forever. We couldn't imagine doing business these days without a cell phone or email but now we rate e-Signatures right up there with Oxygen! Compliance and transparency in our business are paramount and, in addition, to all the obvious savings in both time and money, by being the first to deploy e-Signatures in our market has also given us a real 'differentiator' that all entrepreneurs are desperately seeking. Most of all our clients absolutely love that fact that they can sign their docs over the Internet, in real time-even on their mobile phone, at their convenience and not having to find a fax machine, a scanner or an expensive overnight carrier or courier-no one is running around town chasings docs or signatures."

" e-Signatures is the glue to keep Global e-commerce moving at the speed of life" says Triola "when you add the 'Real-Time' execution of legally binding documents to the actual savings of time and money while delivering 100% compliant docs in minutes vs. days or weeks this is really a no brainer to companies of all sizes" In an upcoming book 'Game Changers', due to be released later this Fall, Triola continued to describe how e-Signatures will become the standard and urges all companies to explore

the true benefits-not only to the bottom line but as stewards and drivers of good Corporate Social Responsibility. With the click of a mouse and zero carbon footprints it is not difficult to understand the impact on our environment for generations to come.

Throughout the entire month Settleware and its' ExpressDox product will be advancing the benefits of e-Signatures with special events and promotions. Please email [info@expressDox.com](mailto:info@expressDox.com) for further information.

#### About Settleware
